

Yasemin Orucu has joined the Energy Team at the World Bank in early 2014 after working on climate and energy policy for 9 years at the Ministry of Energy. She was involved in the international climate change negotiations as the lead negotiator for the emissions mitigation between 2005 and 2013. She was seconded to serve as rapporteur and expert to the Turkish Grand National Assembly Commissions on environment, water management and climate change for 2 years. At the Bank, her work focuses on clean energy and she leads and contributes to a large energy sector technical assistance program, in addition to geothermal development, solar rooftop PV and energy efficiency market development

projects.

She holds an MS and a BS degree from Middle East Technical University, Mining Engineering Department, where she used to work as research assistant for three years. She also has a master's degree from Oxford University, Environmental Change and Management Institute in 2005. She currently is a PhD candidate at the Middle East Technical University, Earth System Sciences Department.
